

Skills and Tools (MCP Schema)

Skill: Research_Bot

Description: Scans repositories and internet sources for updated clinical data.

- `scan_repo(url)`: Analyzes a GitHub repository for CPT/ICD changes.
- `summarize_guidelines(topic)`: Returns a markdown summary of the latest clinical requirements for a test (e.g., "Sleep Apnea 2024 Guidelines").

Skill: eCW_Automator

Description: High-level tools for EMR interaction via Local MCP.

- `get_daily_appointments()`: Returns a list of patients for the day.
- `fetch_chart_data(patient_mrn)`: Returns structured text from Vitals, PMH, and Notes.
- `pend_diagnostic_order(cpt_code, icd_code)`: Automates the "Order Pend" process in eCW.

Skill: Local_Privacy_Guard

Description: Bridge to Ollama for local processing.

- `summarize_phi(raw_text)`: Uses local Llama-3 to strip identifiers and provide a clinical summary.
- `validate_eligibility(summary, rule_set)`: Determines if the patient qualifies for a test locally.
